Corso di Spettrometria di massa avanzata (Recent Trends in Mass Spectrometry)

The course aims at illustrating to PhD students the most recent trends in mass spectrometry of organic compounds, including new techniques for the analysis of complex molecules. The program will include basic aspects of proteomics and interpretation of MS spectra of transition-metal containing, organometallic and polymeric compounds.

Classes: Aula Seminari Dipartimento STC

Friday may 13th 14,30-17

Monday may 16th 14,30-17

Tuesday may 17th 10 – 12,30

Il Direttore del Dipartimento

Prof.ssa Silvia Licoccia
